

SB8035HGE094/VHRM6

Skid-Mount Belt Drive Pressure Cleaner

Industrial Pump

POWERED by
HONDA GX690 Engine

Get the power and performance you need with this durable industrial skid mounted powerhouse featuring steel frame with corrosion resistant finish.

Smooth-Flow block mount flow activated K-7 UL valve

Delivering the ideal combination of high flow and high pressure in a compact configuration. Ready to mount and tank feed on trailer, deck or truck bed. Honda GX690 engine and proven TSF2021 GP low RPM pump ensures a long service life with minimal downtime and maximum reliability in the field with our 4-Groove cog V-Belt drive system.

Standard Accessories

- Heavy Duty gun -wand assembly with QCs
- 50' high pressure hose with QC couplers
- Maxi-Flo 20% Chem Injector w QCs
- 4 Color coded SS QC spray nozzles
- 1 color coded brass QC chemical nozzle
- 1" barbed inlet for optimal tank feeding

Standard Features

- Heavy Duty corrosion resistant steel frame
- Block mount K-7 flow activated unloader valve
- 1" inlet nipple and bypass hose for tank return
- EZ Drain oil kits for Engine and pump service
- Thermal temperature relief safety valve
- Solid rubber shock absorbing Isolation pads
- Reliable 4-V Cog belt drive power transfer
- Honda GX690 V-Twin Industrial engine
- 26 Amp HO engine, supports optional Hot Box
- Heavy Duty GP TSF2021 Industrial pump
- Low speed pump and drive for long life
- Electric Start ignition with key starting
- Battery and marine grade battery box
- Not for sale in the state of California
- Remote 6 gallon rust-free poly fuel tank and QCs
